

Exp. No: 2 Determination and plotting of Electric field and Electric flux density in sphere full of charges with varying radius.

Aim:

To write program for electric field and electric flux density in sphere using SCILAB. **Software required:**

- SCILAB version 6.0.1

Code:

```
EXP 1 EME.sci  Xp 1).sci  exp 1)ime.sci  exp 2.sci  exp 2 case 1.sci  X
1  clc;
2  clear;
3
4  q=input('Enter the value of q=');
5  r=input('Enter the value of r=');
6
7  efcilon=8.854*10^-12;
8  pi=3.14;
9  E=q/(4*pi*efcilon*r^2);
10 disp('The electric field is', [E]);
11 D=E*efcilon;
12 disp('The flux density is', [D]); x = linspace(0, 10, 50);
13 y = E * exp(-0.1 * x);
14 z = D * exp(-0.1 * x);
15
16 figure();
17 subplot(2, 2, 1);
18 plot2d3(x,y);
19 xlabel('R');
20 ylabel('Electric field intensity');
21 title('Electric field intensity');
22 subplot(2, 2, 2);
23 plot2d3(x,z);
24 xlabel('R');
25 ylabel('Electric flux intensity');
26 title('Electric flux intensity');
27
```

Output:

```
Scilab 2026.1.0 Console

Theoretical calculation:

EXP NO. : 2

Determination and plotting of Electric field and Electric flux density in Sphere full of charges with varying radius.

Case (i)

Output :

Enter the value of $q = 4 \times 10^{-6}$

Enter the value of $r = 5 \text{ cm}$.

Electric flux Density (D) vs Radius graph is generated Successfully.

Case (ii)

Output :

Enter the value of $q = 5 \times 10^{-6}$

Enter the value of $r = 3 \text{ cm}$

Linear Density : D vs Radius graph is successfully generated.

Case (iii)

Output :

Enter the value of $q = 5 \times 10^{-6}$

Enter the value of $r = 10 \text{ cm}$

Electric flux Density (D) vs Radius graph is generated successfully.

Case (iv)

Output :

Enter the value of $q = 3 \times 10^{-6}$

Enter the value of $r = 1 \text{ mm}$

Case 1:

Derive and plot the electric field (E) and electric flux density (D) inside a uniformly charged sphere with charge density ρ_0 .

What are the values of E and D at the center and at the surface of the sphere?
